## Project

### Royal Swiss Apartments

Barnes Common  
London SW13

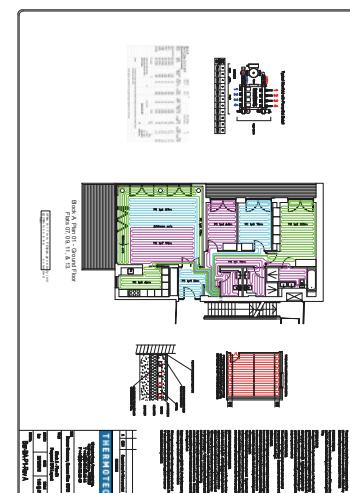

#### Project Brief

In consultation with Andrew Towns-Wadey (Builders) Ltd, Thermotec were asked to provide a complete design and installation scheme, in compliance with the latest environmental and technological heating systems.

#### Scope of Works

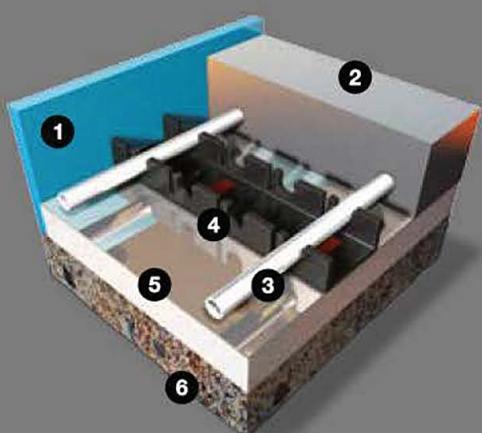

Thermotec delivered a fully integrated floor build up system from the subfloor base to the final floor screed, using our TPA11 Aquafloor Cliprail System and touch screen controls. The project was managed, installed and supervised by Thermotec, and was delivered on time and within budget.

#### Project Details

The development has been carefully considered with acoustic treatments and walls to ensure that a relaxing and peaceful environment is available to its residents, with specifications such as home entertainment systems and comfort cooling as standard. Spacious balconies are available on all floors giving residents direct access to outside space with fantastic views of the common and surrounding areas.

1,398 m<sup>2</sup>

#### Aquafloor Installation

- 1 Expansion edging strip
- 2 Screed minimum 65mm
- 3 Aquafloor heating pipe
- 4 Heating pipe rail
- 5 Foil faced insulation min 25mm
- 6 Solid sub-floor

Unsurpassed in logistics and project planning. Assured quality installations for the mechanical and electric sector.
